

SUMEET PATIL

Week: Aug 30, 2024 – Sep 13, 2024

Task Accomplished:

1. Worked upon initial design for the backend development.
2. Created a Spring boot application for the OAuth 2.0 authentication.
3. Started creating wireframe of web application and functionality

Research on Tools:

1. Exploring the Google Authentication parameters, keys and how it can scale to 1000 users.
2. Which Database would be a right fit for this purpose.
3. Database design and information to hold while user is logged in.
