SUMEET PATIL

Week: Sep 14, 2024 – Sep 27,2024

Task Accomplished:

1. Worked upon user, account and authentication rest api design and initial development for the backend development.
2. Simplified and implied login OAuth2.0 from Google and Github for convenient access to the application
3. Started using mono repo for better versioning and maintenance

Research on Tools:

1. Exploring the Postman and swagger tool for better accessibility and testing the API
2. Database design and information to hold while user is logged in.

The commit and development for the application can be accessed on github repo as below:
